

Product description		
Description	Native Whey Protein Isolate 90% is a premium form of whey protein extracted directly from skimmed milk, rather than being a byproduct of cheese production. Through specialized filtration techniques like microfiltration or ultrafiltration, native whey preserves a purer protein structure with a superior amino acid profile free of CGMP, particularly rich in essential amino acids like leucine, which is the closest protein composition to the one present in breast milk. This minimal processing ensures fewer impurities and denatured proteins, making it a high quality choice for those seeking optimal protein benefits.	
Colour	White to light creamy	
Taste	Specific, mild, without foreign flavours	
Aroma	Specific, without foreign aroma	
Components	Whey protein isolate, sunflower lecithin (if instantized)	
Allergens	Milk and products thereof	
Organoleptical		
Odour	Typical/ free from off odour	Organoleptic evaluation

Microbiological		
Total plate count/g	< 30.000	VDLUFA M 6.3.1
Yeasts/g	< 50	VDLUFA M 7.7.2
Moulds/g	< 50	VDLUFA M 7.7.2
Enterobacteriaceae/g	< 10	VDLUFA M 7.4.2
Salmonella/25g	neg.	External lab/each batch
Physical & Chemical		
pH	6,1 - 6,5	VDLUFA C 8.2
Scorched particles	Disc A - B	ADPI
Protein i.d.m. (Nx6,38)	min. 90,0 %	VDLUFA C 30.2
Fat	max. 1,5 %	VDLUFA C 15.2.3
Ash (550°C)	max. 3,5 %	VDLUFA C 10.2
Moisture (102°C)	max. 6,0 %	VDLUFA C 35.6
